**RE: Notice of New Contract between the Town of Bradley and Waste Connections**

Dear Citizens of Bradley,

On June 10, 2025, the Board of Trustees for the Town of Bradley had a public board meeting, to which the agenda was made available to the public. The contract between the Town of Bradley and Waste Connections has expired and at the meeting there was discussion as to whether to join a new contract with Waste Connections, or to seek out a new waste management service.

The Board was made aware of the disruption created by the recent increase in Waste Connection's monthly service price. The Town made Waste Connections aware of the people's dissatisfaction and Bradley's intention to look for other service providers. In response, Waste Connections countered with a cheaper price. After the Trustees took a vote, it was decided that the Town of Bradley would enter into an annual contract with Waste Connections, with new terms and conditions.

The last day Rural Water District #3 will bill for trash on their water bill is July 10<sup>th</sup>, 2025. Waste Connections will be billing you, the citizens, directly, starting in August 2025. Let this serve as notice of this change.

Please contact the Town Clerk with any questions or concerns you may have regarding the abovementioned information. Thank you for your cooperation.

Sincerely,

  
City Attorney
